The time period for reply, if any, is set in the attached communication.

## Office Action Summary

Application No.

10/718,122

Applicant(s)

CARNEY ET AL.

Examiner

M. Alexandra Elve

Art Unit

1793

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 21 August 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-8 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-8 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 18 December 2006 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kimura et al. (JP 01-215290) in view of Bosch (DE 39-38-779 A1), Takahashi (USPN 4,581,939) and Mosavi et al. (USPN 6,252,195).

Kimura et al. discloses an apparatus and method for the laser cutting of cells. The condenser lens is vibrated in the axial direction of the laser beam. In addition the stage of the workpiece vibrates.

Kimura et al. does not teach the type of laser, the formation of a hole, the use of a spherical lens or the formation of a surgical needle.

Bosch discloses the laser drilling of small holes in a metal part. The laser microdrills the metal to form boreholes. Drilling material (debris) is ejected due to the vibration of the workpiece. Vibration is transmitted to the ram (12, 13) and subsequently the work holder (3). The oscillation generator is connected (9).

Takahashi disclose the use of vibration and a laser to find defects ultrasonically. One half of the parallel rays of the light are projected on the surface of the specimen by a half mirror and another half of the parallel rays of light are projected on the surface of the specimen by a spherical lens.

It would have been obvious to one of ordinary skill in the art at the time of the invention to use a vibrating workpiece as taught by Kimura et al. and Bosch because this deals with small systems which are prone to vibration and debris removal problems. In addition, the spherical lens as taught by Takahashi is merely a specific type of lens used in laser system and hence is a design choice and variation (design variation and rearrangement of parts is known in the art).

Mosavi et al. discloses forming holes in a surgical needle using an Nd-YAG laser. High-energy laser pulses form a blind hole in the proximal end of a surgical needle.

It would have been obvious to one of ordinary skill in the art at the time of the invention to make surgical needles, as taught by Mosavi et al., in the Kimura et al. and Bosch system because the vibrational system ensures a high quality bore hole.

The rearrangement of parts was held to have been obvious. In re Japikse 86 USPQ 70.

### ***Response to Arguments***

Applicant's arguments filed 8/21/07 have been fully considered but they are not persuasive.

Applicant's arguments with respect to Fillion and the claims have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. Alexandra Elve whose telephone number is 571-272-1173. The examiner can normally be reached on 7:30-4:00 Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jonathan Johnson can be reached on 571-272-1177. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
